PROJECTS

Personal-Doctor

- It is a health chatbot in which users report the symptoms of their illness to the app. Based on the gathered information fed to its smart algorithm, Sensely interprets the user's symptoms and recommends a diagnosis.
- <https://personal-doc.herokuapp.com/>

Progressor365 Bot for Instagram

- A personal interest project, a scheduled job based bot for posting year completion progress on Instagram, after processing and writing the information on an image using Python.
- <https://www.instagram.com/progressor365>

Node Chat Application

- A simple real-time chat application. It features public chat rooms or you can create private chat rooms with friends, family, etc. You can chat, attach your files and share your live location as well.
- <http://node-room-chat.herokuapp.com>

Live Cricket Streamer

- A web-app which streams the live cricket match on the local host of college premises. It's more like Hotstar on localhost
